

This is a sample PDF used to demonstrate some basic features of [www.GoTryTHIS.com](http://www.GoTryTHIS.com).

GoTryTHIS lets you track and control clicks on all your marketing for all your web sites in one place.

In this example it is tracking how well different sample marketing works to drive traffic to this PDF: <http://www.AnExampleSite.com/pdfs/billsmith.pdf>

I made a link in GoTryTHIS that directs people here, and then sent out three different e-mails to see which content converted best. Each had one of these links:

[www.AnExampleSite.com/billsmith-music.pdf](http://www.AnExampleSite.com/billsmith-music.pdf)  
[www.AnExampleSite.com/billsmith-interview.pdf](http://www.AnExampleSite.com/billsmith-interview.pdf)  
[www.AnExampleSite.com/billsmith-rocks.pdf](http://www.AnExampleSite.com/billsmith-rocks.pdf)

In GoTryTHIS, data grids and live graphs show me which one works better over time, where those links end up published on the Internet, and much more.
